DETAILED ACTION

The IDS received 3/3/2005, 9/7/2006, the preliminary amendment received 3/3/2005 have been entered.

Election

Applicant's election with traverse of Group V, claim 30, in the reply filed on 9/28/2006 is acknowledged. The traversal is on the ground(s) that there is a special technical feature (compounds of claim 31) presented in the Groups III and V. This is not found persuasive because the special technical feature needs to be presented among all the invention groups not just in two groups and the invention groups are differ in scope.

The restriction requirement is still deemed proper and is therefore made FINAL.

Claims 1-5, 8-12, 14, 16-19, 22, 23, 31-32 are nonelected and thus are withdrawn from further consideration.

Only claim 30 is presented for examination on the merits.

The specie elected is compound 28 in claim 30. This single compound/structure was searched and not found. The examiner then searched compound 23, which was found. No claims presented are limited to compound 28.

Claim Objections

1. Claim 30 is objected to because of the following informalities: a period is missing at the end of the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1657

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 30 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 30 "capable of" does not state what actually occurs.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 30 is rejected under 35 U.S.C. 102(b) as being anticipated by Leemann et al. (Progr. Drug. Res. 1963;6:151-278).

Leemann teaches compound 23 (salicylanilide, 4'-chloro-5-iodo-) as source of fluorescence and the chemical structure (abstract and page 276).

4. Claim 30 is rejected under 35 U.S.C. 102(b) as being anticipated by Ciampa et al. (Farmaco, Edizione Pratica 1966;21(2):77-99).

Ciampa teaches compound 23 (salicylanilide, 4'-chloro-5-iodo-) in drug analysis (abstract).

Art Unit: 1657

Therefore, the cited reference is deemed to anticipate the instant claims above.
